FROGGIES 100MG CBD SOURZ	4x25MG FROGGIES/PKG	GR 768864	BX	16.99

What is CBD (Cannabidiol)?

CBD, or cannabidiol, is a cannabinoid found in the hemp plant. As we've discovered more about the human species as well as the plants that we've learned of the immense health value that CBD brings to the table. It has quickly become a staple supplement for millions who seek a natural alternative to dangerous pharmaceuticals, alien to nature's perfect remedies.

Sublingual CBD Oils - also known as CBD Tinctures or CBD Hemp Oil – are the most popular type of CBD products, because of their high bioavailability and rapid absorption. There are many other kinds of products as well, including CBD edibles, CBD topicals, and even CBD-infused Coffee. CBD products have gained immense popularity in health and wellness circles thanks to their natural support of our endocannabinoid system (ECS).

CBD Oil Secret Ingredient

Green Roads uses a pharmaceutical-grade the highest quality cannabidiol and natural ingredients and rich broad spectrum Cannabidiol oil that is packed with the nutrients from the hemp plant. Phytocannabinoids are the herbal, natural, and classical cannabinoids found in the cannabis / hemp plant.

There are over 60 cannabinoids that have been isolated from the plant.

Cannabidiol (CBD), Cannabinol (CBN), and Terpenes are the most prevalent.

Cannabidiol (CBD) is non psychoactive and contains non-detectable THC. In fact, it has been noted that CBD acts as an antagonist to THC and therefore it negates the psychoactive effects of THC.

It is now being understood that the human body does in fact have an Endocannabinoid system, which is why quality CBD has been shown to be an effective form of alternative treatment. The Endocannabinoid system (ECS) is a group of endogenous cannabinoid receptors located in the mammalian brain and throughout the central and peripheral nervous systems, consisting of neuromodulatory lipids and their receptors.

CBD specifically interacts with the CB1 and CB2 receptors that send signals to wake up and strengthen the immune system naturally. The boost of the immune system can help the body fight off the bad cells that are weakening it in the first place.
